WP Twin

WP Twin Wordpress Cloner

If you are curious to see how WP Twin works, I recorded 5 minute video showing you hows it done, **check it out below.**

Here's a quick list of reasons that I love [WP Twin](#):

You can Move Your WordPress Blog To a Completely New Hosting Account... Easily and Quickly!

- It saves you money. **No pricing or licensing restrictions.** That's right, you pay one reasonable price for unlimited use on unlimited blogs! With lifetime updates of course. None of that annual or monthly BS that is getting more and more common.
- It saves you time. In fact, this is what *WP Twin* does best, it saves you valuable time. In many different ways - more on that later.
- It saves you headaches. No more frustration because you aren't trying to install and use one of the user UN-friendly alternatives to [WP Twin](#). 1 click and your site is backed up. 2 clicks and its cloned!
- It gives you peace of mind. Now you can safely mess around with your blog because you know you have an exact copy waiting in case something does happen. Just imagine if your website - or worse, your clients site, were to crash. WP Twin takes care of that problem with quick and easy backups.

It comes with a worthy Bonus which normally sells for \$29.95 (more on that Below).

- WP Twin is Compatible with **ALL versions** of wordpress, including older versions.
- It protects you from hackers. These days, its only a matter of time before someone hacks your site (unfortunately). Now you no longer have to be at their mercy. Protect yourself with WP Twin (of course, its up to you to make regular backups).
- **WP Twin** saves you from the repetitive and tiresome process of installing wordpress manually - having to install and configure each and every plug-in, install and configure the theme, etc.. I get tired just writing about it ! (maybe because I've done it so many times).

Thesis theme users tip: You are going to love WP Twin. Thesis is a great theme with a ton of options, but as anyone who has used it knows, it can be a pain to setup. With WP Twin you only have to set up Thesis one last time, clone it, and you're done. Never again have to set up Thesis (until the next update!).

- And lets not forget WP Twin's affiliate program. Can you say **50% commissions, Lifetime lead tracking, and second tier commission structure.** Enough said! (Tip; even if you don't purchase WP Twin you can still become a Jason Fladlien affiliate and promote it.)

The Bonus

. To sweeten the pot even more, Jason Fladlien has decided to include a Bonus (a product called **Sales Letter Design** which normally sells for [\\$29.95 here](#)). You get 25 wordpress sales letter themes, AND (the best part) a special wordpress plugin with **7 fill-in-the blank salesletters!**

And **below is the short video** I mentioned earlier.
